

TAG THAT *trend* CHROME WARRIOR

Scarlett Senter

Scarlett Senter is based in Kings Lynn, Norfolk in the UK. A salon and academy owner, Scarlett has been a nail professional for 10 years. Fuelled by a dynamic drive and passion for nails, Scarlett's mission is to guide upcoming nail technicians and help them gain confidence as well as skills. An award-winning nail artist with over 70 accolades, Scarlett holds the record for the most award-winning photographic images in the UK. She's also the proud bearer of three *Scratch Stars* awards, (two for *Nail Artist of the Year* and one for *Mixed Media Artist of the Year*). Her work has graced the cover of three *Scratch* magazines as well as *Nail Couture* and *Nailpro* magazine. She's often invited to judge UK national nail competitions and enjoys seeing competitors push themselves and achieve their goals.

1

Size up five full cover nail tips and buff the surface of each with a 240-grit buffer and remove all dust.

2

Next, take one tip and apply two thin coats of Nailchemy gel polish in Onyx and cure for 30 seconds in the Nailchemy LED lamp.

3

Remove the inhibition layer with a lint-free wipe and then apply a thin coat of your desired color from Nailchemy's Dragon Glass gel polish collection.

4

Before curing in the lamp, use a small round magnet and place close to the nail. It will move the polish and create the nail art design. Try not to press the magnet into the polish as this will disturb the end result. Cure for 30 seconds in the LED lamp.

5

Apply a thin layer of Nailchemy No Wipe top coat over the entire nail and cure for 30 seconds to complete the design.
