1

Start with a base of your favorite shade of pink gel polish and cure, depending on the gel that you're using, you may need a few coats to get full opacity.

2

Apply a layer of foil gel and cure.

3

Gently wipe off the back of your transfer foil with 99% IPA, prior to using the foil (I'm using a kaleidoscopic silver foil). Then press the foil onto the nail in a touch-and-go motion across the entire surface. Apply top coat and cure.

4

Create a Barbie-inspired 'B' design. Once you're happy with it, sprinkle acrylic powder over it.

5

Saturate with gel paint and cure. Then remove excess powder.

6

To complete the design, place jewelry gel where you want your crystal embellishment. This will elevate the overall look of the design. Add your crystal and cure.
