

# TAG THAT trend

## LORD OF THE JUNGLE

### WHAT YOU NEED

Transfer foils, UV/LED gel polish in white, natural brown and clear. Fluorescent UV/LED gel polish in pink and blue, matte UV/LED top coat gel.

### GETTING PREPARED

Prepare your table in a very organized manner eliminating cross contamination from the various products. Pay attention and make sure all necessary products are within hand's reach, so the colors are on the nail desk and ready to use.

**1** Apply 2 layers of Be Jeweled UV/LED gel polish 02 in black. Apply UV/LED gel matte top coat to the set of nail tips. Cure.

**2** Paint the lion portrait with White Liner Gel (UV/LED Art Gel). Cure.

## Jeanette Ulriksen

Jeanette has been in the nail industry for 17 years. She began her journey after attending a basic nail course in acrylic. It was during that class that Jeanette was offered a job as a nail tech and educator by the organizer. Within six months, she took all the required classes to gain the skills necessary to become a trainer, passed the relevant exams and became a master educator.

Keen to stretch herself, Jeanette jumped on the competition circuit and now enjoys a wealth of wins to her name from all over the world with medals won in categories from French and gel sculpture to mixed media and educator skills. Running her own salon and nail school in Denmark, Jeanette has educated and mentored several nails techs that have gone onto win medals all over the world. In 2013 Jeanette became an international judge and has been judging competitions all over the world since then. Hanging up her competition hat in 2015 due to lack of time to practice, Jeanette has since placed her focus on education, judging, and styling nails for magazine's step by step tutorials and cover pictures.

Today Jeanette is the proud owner of a nail product distribution company, runs an academy and a professional team of educators and ambassadors whilst judging and educating students around the globe.
