WHAT YOU NEED

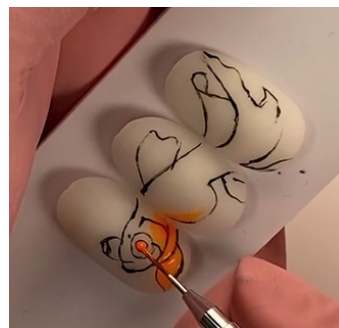

#0 liner brush, black, brown, orange, green and blue UV/LED gel polish colors, #2 Oval Brush

GETTING PREPARED

Prepare your table in an organized manner eliminating cross contamination from the products. Make sure all necessary products are within hand's reach, so the colors are ready to use on the nail desk.

1 Use a liner brush to sketch the main outline of the fish across three nails with black UV/LED gel polish. When the outline is complete, cure the design.

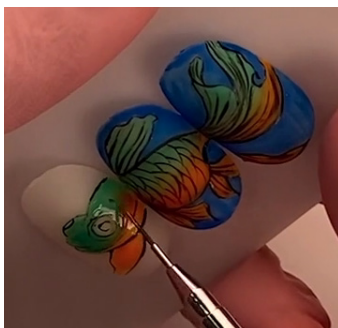

2 Use a small detailer brush to add orange UV/LED gel polish onto the body of the fish design.

3 Add in green & teal UV/LED gel polish colors to build up the design.

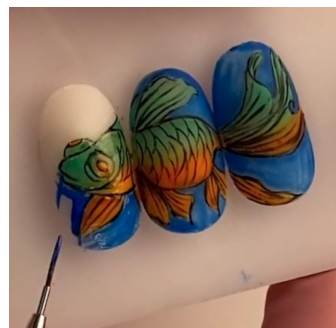

4 Use a blue UV/LED gel polish color to fill in the water background.

5 Use black UV/LED gel polish to add lines & details to the fish.

6 Finalize details of color, highlights & shadows to complete the fish design.

7 Finish adding in the water background.

8 Finalize the details with black outlines & shading. Apply UV/LED matte top coat & cure.
